

IP cameras that are capable of delivering an image with one million pixels or more are commonly referred to as Megapixel cameras.

Below are some examples:

1.3 megapixels = 1280x1024 pixels

1.4 megapixels = 1400x1050 pixels

1.9 megapixels = 1600x1200 pixels

2 megapixels = 1920x1080 pixels

2.3 megapixels = 1920x1200 pixels

3.1 megapixels = 2048x1536 pixels

4.1 megapixels = 2560x1600 pixels

5.2 megapixels = 2560x2048 pixels

Other IP standard resolutions: 4CIF or D1 (720X480), VGA (640X480), CIF (352X240), QVGA( 320X240), QCIF(176X144)

Note: standard VGA resolution is 640x480, SXGA res. is 1280x1024, and Full HD 1080P = 1920x1080 pixels.
